

UNFILTERED BLACK SEED OIL

PRODUCT SPECIFICATION SHEET

PRODUCT SPECIFICATION SHEET

PRODUCT DESCRIPTION

A full-spectrum, unfiltered black seed oil sourced from wild-grown *Nigella sativa* plants. Grown in the fertile Ganges Delta – nourished by the glacial waters of the Himalayas – and produced using traditional, low-intervention methods that preserve the oil's full therapeutic profile. Hand-harvested, sun-dried, and cold-pressed once at low temperature. Naturally contains active seed sediments

TECHNICAL SPECIFICATIONS

Botanical Name: Nigella sativa

Origin: Ganges Delta, Bangladesh Soil & Water Source
Alluvial soil nourished by Himalayan glacial runoff Harvest
Method Hand - harvested at peak ripeness

Drying Method: Traditional sun-drying of seeds (no
oven/dehydration)

Extraction: Virgin cold-press, single press (40°C)

Filtration” None Unfiltered with suspended seed sediment
Colour & Texture Deep black-gold hue, rich, slightly viscous

Thymoquinone (TQ) TQ Tested – varies per batch (lab
report available on request) Ranges from 1.65% to 2.1% per
100ml of oil

Packaging: 100ml & 200ml amber glass bottle /
6 bottles per carton

Private Label Available: Yes (international only -
not available to Australia and NZ) – MOQ applies

PRODUCT BENEFITS

Unfiltered & Full-Spectrum

Contains natural seed sediments for enhanced bioactivity – not stripped or refined.

Beyond Organic

Grown in Alluvial Soil Nourished by Himalayan Glacial Waters, naturally mineral-rich, untouched by commercial farming.

Hand-Harvested at Peak Ripeness

No machinery, no bruising – just expert care and traditional methods.

Sun-Dried, Not Oven-Processed

Preserves fragile nutrients and volatile compounds, especially thymoquinone (TQ).

Cold-Pressed Once, Below 40°C

Maximizes purity and bioavailability – no heat damage or dilution.

Packaged in UV-Protective Amber Glass

Protects the oil from light degradation naturally – no preservatives.

Batch-Tested TQ Certification

Australian Laboratory tested for Thymoquinone only in Australia.
